Senior fullstack React Developer (MERN)

Description

We’re looking for a Senior fullstack React Developer (Mern) to join us and work with an **international tech company** building complex software solutions for niche markets.

Our team is passionate about creating high-quality mobile applications. We don’t micromanage, we give you ownership, trust, and the freedom to find the best solutions. Independence, attention to detail, and commitment to quality define how we work.

Responsibilities

- Architect, design, and implement scalable and complex web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Lead the development lifecycle from concept through deployment, ensuring that best practices are followed for code quality and performance.
- Collaborate closely with product managers, project managers, designers, and other developers.
- Troubleshoot, debug, and optimize applications to improve performance and enhance user experience.
- Document development processes, code changes, and architectural decisions to support future maintenance and upgrades.

Qualifications

- Proven experience as a Full Stack Developer with a strong focus on the MERN stack.
- Extensive knowledge of web technologies, including HTML, CSS, JavaScript, and frameworks such as React.js.
- Experience with backend technologies and frameworks, particularly Express.js and Node.js, and proficiency in database management with MongoDB.
- Strong understanding of software development principles, design patterns, and best practices for building scalable applications.
- Ability to work autonomously, prioritize tasks effectively, and meet project deadlines without micromanagement.
- Excellent problem-solving skills with a strong attention to detail, ensuring high-quality deliverables.
- Exceptional communication skills to effectively collaborate with team members and stakeholders.

Job Benefits

- Friendly, decentralized, and independent way of working.
- Competitive pay in US Dollars.
