Senior React Developer

Description

We're looking for a Senior React Developer to join us and work with an international tech company building advanced web applications for niche markets.

Our team values independence, clarity, and high-quality delivery. We don't micromanage, you'll have ownership, trust, and the freedom to design solutions that perform, scale, and stand the test of time.

If you care about clean code, strong architecture, and creating seamless user experiences, this role is for you.

Responsibilities

- Develop and maintain sophisticated web applications using React.js
- Architect and implement new features with scalability, performance, and security in mind
- Collaborate with backend developers, designers, and product managers to deliver cohesive experiences
- Optimize front-end performance across devices and browsers
- Debug, troubleshoot, and resolve complex UI issues
- Stay current with modern JavaScript, React libraries, and front-end best practices
- Take full ownership of delivering high-quality, maintainable, and reliable web solutions

Qualifications

- Extensive experience in front-end development with React.js
- Strong JavaScript (ES6+) skills and a deep understanding of component-based architecture
- Excellent knowledge of HTML, CSS, responsive design, and UI performance optimization
- Experience working with REST APIs and state management tools such as Redux
- Familiarity with Git and front-end build tools
- Ability to work independently and deliver high-quality code within deadlines
- Excellent written and spoken English
- A proactive, detail-oriented, and solution-driven mindset
